PHOSPHINE (5% -<10%) in ARGON, HELIUM or NITROGEN

Safety Data Sheet LIND-M0166
Issue date: 05/05/2015 Revision date: 02/23/2022 Supersedes: 03/30/2021
Version: 1.4

SECTION 1: Product and company identification

1.1. Product identifier
Product form : Mixture
Product name : PHOSPHINE (5% -<10%) in ARGON, HELIUM or NITROGEN

1.2. Relevant identified uses of the substance or mixture and uses advised against
Use of the substance/mixture : Electronic
Industrial and professional use

1.3. Details of the supplier of the safety data sheet
Linde Inc.
10 Riverview Drive
Danbury, CT 06810-6268, USA
www.lindeus.com
Electronics gas products 1-800-932-0624 or 1-908-329-9700
Linde Inc. 1-844-44LINDE (1-844-445-4633)
For additional product information contact your local customer service.

1.4. Emergency telephone number
Emergency number : Onsite Emergency: 1-800-645-4633
CHEMTREC, 24 hr/day 7 days/week
— Within USA: 1-800-424-9300, Outside USA: 001-703-527-3887
(collect calls accepted, Contract 17729)

SECTION 2: Hazard identification

2.1. Classification of the substance or mixture
GHS-US classification
Pyr. Gas H250
Flam. Gas 1 H220
Press. Gas (Comp.) H280
Acute Tox. 2 (Inhalation: gas) H330
Skin Corr. 1B H314
Eye Dam. 1 H318

2.2. Label elements
GHS US labelling
Hazard pictograms (GHS US):

GHS02   GHS04   GHS05   GHS06

Signal word (GHS US) : Danger
Hazard statements (GHS US) :
H220 - EXTREMELY FLAMMABLE GAS
H250 - CATCHES FIRE SPONTANEOUSLY IF EXPOSED TO AIR
H280 - CONTAINS GAS UNDER PRESSURE; MAY EXPLODE IF HEATED
H314 - CAUSES SEVERE SKIN BURNS AND EYE DAMAGE
H330 - FATAL IF INHALED
CGA-HG04 - MAY FORM EXPLOSIVE MIXTURES WITH AIR
CGA-HG11 - SYMPTOMS MAY BE DELAYED

EN (English)  SDS ID: LIND-M0166  1/12

This document is only controlled while on the Linde US website and a copy of this controlled version is available for download. Linde cannot assure the integrity or accuracy of any version of this document after it has been downloaded or removed from our website.
PHOSPHINE (5% -<10%) in ARGON, HELIUM or NITROGEN
Safety Data Sheet LIND-M0166
Issue date: 05/05/2015 Revision date: 02/23/2022 Supersedes: 03/30/2021
Version: 1.4
EN (English) SDS ID: LIND-M0166

Precautionary statements (GHS US):

P202 - Do not handle until all safety precautions have been read and understood.
P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P260 - Do not breathe gas/vapours
P264 - Wash exposed skin thoroughly after handling
P280+P284 - Wear protective gloves, protective clothing, eye protection, respiratory protection, and/or face protection.
P233 - Keep container tightly closed.
P301+P330+P331 - IF SWALLOWED: Rinse mouth. Do NOT induce vomiting
P303+P361+P353 - IF ON SKIN OR (HAIR): Take off immediately all contaminated clothing, Rinse skin with water/shower.
P304+P340 - IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P310 - Immediately call a POISON CENTER/doctor.
P305, P351, P338, P310 - IF IN EYES: Rinse cautiously with water for several minutes.
Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/doctor.
P363 - Wash contaminated clothing before reuse.
P377 - LEAKING GAS FIRE: Do not extinguish, unless leak can be stopped safely. P381 - Eliminate all ignition sources if safe to do so.
CGA-PG11 - Never put cylinders into unventilated areas of passenger vehicles.
P405 - Store locked up.
P501 - Dispose of contents/container in accordance with container Supplier/owner instructions
P271+P403 - Use and store only outdoors or in a well-ventilated place.
CGA-PG05 - Use a back flow preventive device in the piping.
CGA-PG12 - Do not open valve until connected to equipment prepared for use.
CGA-PG20+CGA-PG10 - Use only with equipment of compatible materials of construction and rated for cylinder pressure.
CGA-PG06 - Close valve after each use and when empty.
CGA-PG02 - Protect from sunlight when ambient temperature exceeds 52°C (125°F).
CGA-PG17 - Use only with equipment purged with inert gas or evacuated prior to discharge from cylinder.
CGA-PG18 - When returning cylinder, install leak tight valve outlet cap or plug.
P222 - Do not allow contact with air.
P308+P313 - IF exposed or concerned: Get medical advice/attention.

2.3. Other hazards
Other hazards which do not result in classification: Asphyxiant in high concentrations.

2.4. Unknown acute toxicity (GHS US)
No data available

SECTION 3: Composition/information on ingredients

3.1. Substances
Not applicable

3.2. Mixtures

SECTION 4: First aid measures

4.1. Description of first aid measures
First-aid measures general: Treat symptomatically.
First-aid measures after inhalation: Remove to fresh air and keep at rest in a position comfortable for breathing. If not breathing, give artificial respiration. If breathing is difficult, trained personnel should give oxygen. Call a physician.
PHOSPHINE (5% -<10%) in ARGON, HELIUM or NITROGEN
Safety Data Sheet LIND-M0166
Issue date: 05/05/2015 Revision date: 02/23/2022 Supersedes: 03/30/2021
Version: 1.4

First-aid measures after eye contact: Immediately flush eyes thoroughly with water for at least 15 minutes. Hold the eyelids open and away from the eyeballs to ensure that all surfaces are flushed thoroughly. Contact an ophthalmologist immediately.

4.2. Most important symptoms and effects, both acute and delayed

Symptoms/effects: Fatal if inhaled. Inhalation may cause severe respiratory irritation and pulmonary edema. Symptoms of overexposure can include headache, coughing, shortness of breath, wheezing, phlegm, abdominal pain, nausea, vomiting, thirst, drowsiness, double vision, dizziness, tremors, and coma. Symptoms may be delayed. Ignited gas can cause thermal burns. Irritating to eyes, respiratory system and skin.

4.3. Indication of any immediate medical attention and special treatment needed

Obtain medical assistance.

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media: Carbon dioxide, Dry chemical, Water spray or fog. Use extinguishing media appropriate for surrounding fire.

5.2. Special hazards arising from the substance or mixture

Fire hazard: CATCHES FIRE SPONTANEOUSLY IF EXPOSED TO AIR. May form explosive mixtures with air. Low ignition energy. Will be easily ignited by heat, sparks or flames. Evolves hydrogen and ignites on contact with many materials. Vapors may travel to source of ignition and flash back. Vapors from liquefied gas are initially heavier than air and spread along ground. Vapors may accumulate in confined areas (basement, tanks, hopper/tank cars, etc.). Cylinders may rupture under extreme heat.

Explosion hazard: EXTREMELY FLAMMABLE GAS. Forms explosive mixtures with air and oxidizing agents.

Reactivity: No reactivity hazard other than the effects described in sub-sections below.

5.3. Advice for firefighters

Firefighting instructions: Evacuate all personnel from the danger area. Use self-contained breathing apparatus (SCBA) and protective clothing. Immediately cool containers with water from maximum distance. Stop flow of gas if safe to do so, while continuing cooling water spray. Remove ignition sources if safe to do so. Remove containers from area of fire if safe to do so. On-site fire brigades must comply with their provincial and local fire code regulations.

Protection during firefighting: Compressed gas: asphyxiant. Suffocation hazard by lack of oxygen. Danger! FLAMMABLE, HIGH PRESSURE GAS.

Special protective equipment for fire fighters: Standard protective clothing and equipment (Self Contained Breathing Apparatus) for fire fighters.

Specific methods: If possible, stop the flow of gas. Do not extinguish the fire until supply is shut off as otherwise an explosive-ignition may occur. If the fire is extinguished and the flow of gas continues, use increased ventilation to prevent build-up of explosive atmosphere. Ventilation fans must be explosion proof. Use non-sparking tools to close container valves. Use water spray to cool surrounding containers. Be cautious of a Boiling Liquid Evaporating Vapor Explosion, BLEVE, if flame is impinging on surrounding containers. For massive fire, use unmanned hose holders or monitor nozzles; if this is impossible withdraw from area and let fire burn. Damaged cylinders should be handled only by specialists.

Other information: Containers are equipped with a pressure relief device. (Exceptions may exist where authorized by TC.).

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

General measures: If venting or leaking gas catches fire, do not extinguish flames. Flammable vapors may spread from leak, creating an explosive reignition hazard. Vapors can be ignited by pilot lights, other flames, smoking, sparks, heaters, electrical equipment, static discharge, or other ignition sources at locations distant from product handling point. Explosive atmospheres may linger. Before entering an area, especially a confined area, check the atmosphere with an appropriate device.
PHOSPHINE (5% -<10%) in ARGON, HELIUM or NITROGEN

Safety Data Sheet LIND-M0166
Issue date: 05/05/2015
Revision date: 02/23/2022
Supersedes: 03/30/2021
Version: 1.4

EN (English)
SDS ID: LIND-M0166 4/12

PHOSPHINE (5% -<10%) in ARGON, HELIUM or NITROGEN

6.1.1. For non-emergency personnel
No additional information available

6.1.2. For emergency responders
No additional information available

6.2. Environmental precautions
Prevent waste from contaminating the surrounding environment. Prevent soil and water pollution. Dispose of contents/container in accordance with local/regional/national/international regulations. Contact supplier for any special requirements.

6.3. Methods and material for containment and cleaning up
No additional information available

6.4. Reference to other sections
See also sections 8 and 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling
Precautions for safe handling:
Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use only non-sparking tools. Use only explosion-proof equipment.

Wear leather safety gloves and safety shoes when handling cylinders. Protect containers from physical damage; do not drag, roll, slide or drop. While moving cylinder, always keep in place removable valve cover. Never attempt to lift a cylinder by its cap; the cap is intended solely to protect the valve. When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport cylinders. Never insert an object (e.g., wrench, screwdriver, pry bar) into cap openings; doing so may damage the valve and cause a leak. Use an adjustable strap wrench to remove over-tight or rusted caps. Slowly open the valve. If the valve is hard to open, discontinue use and contact your supplier. Close the container valve after each use; keep closed even when empty. Never apply flame or localized heat directly to any part of the container. High temperatures may damage the container and could cause the pressure relief device to fail prematurely, venting the container contents. For other precautions in using this product, see section 16.

7.2. Conditions for safe storage, including any incompatibilities
Storage conditions:
Store only where temperature will not exceed 125°F (52°C). Post "No Smoking/No Open Flames" signs in storage and use areas. There must be no sources of ignition. Separate packages and protect against potential fire and/or explosion damage following appropriate codes and requirements (e.g., NFPA 30, NFPA 55, NFPA 70, and/or NFPA 221 in the U.S.) or according to requirements determined by the Authority Having Jurisdiction (AHJ). Always secure containers upright to keep them from falling or being knocked over. Install valve protection cap, if provided, firmly in place by hand when the container is not in use. Store full and empty containers separately. Use a first-in, first-out inventory system to prevent storing full containers for long periods. For other precautions in using this product, see section 16.

Store in a cool, well-ventilated place. Store and use with adequate ventilation. Store only where temperature will not exceed 125°F (52°C). Firmly secure containers upright to keep them from falling or being knocked over. Install valve protection cap firmly in place by hand. Store full and empty containers separately. Use a first-in, first-out inventory system to prevent storing full containers for long periods.

OTHER PRECAUTIONS FOR HANDLING, STORAGE, AND USE: When handling product under pressure, use piping and equipment adequately designed to withstand the pressures to be encountered. Never work on a pressurized system. Use a back flow preventive device in the piping. Gases can cause rapid suffocation because of oxygen deficiency; store and use with adequate ventilation. If a leak occurs, close the container valve and blow down the system in a safe and environmentally correct manner in compliance with all international, federal/national, state/provincial, and local laws; then repair the leak. Never place a container where it may become part of an electrical circuit.

8.2. Exposure controls

Appropriate engineering controls: Use an explosion-proof local exhaust system. Local exhaust and general ventilation must be adequate to meet exposure standards. MECHANICAL (GENERAL): Inadequate - Use only in a closed system. Use explosion proof equipment and lighting. Provide adequate general and local exhaust ventilation. Ensure exposure is below occupational exposure limits (where available).

Eye protection: Provide readily accessible eye wash stations and safety showers. Wear safety glasses with side shields.

Skin and body protection: Wear metatarsal shoes and work gloves for cylinder handling, and protective clothing where needed. Wear appropriate chemical gloves during cylinder changeout or wherever contact with product is possible.

Respiratory protection: When workplace conditions warrant respirator use, follow a respiratory protection program that meets or exceeds the requirements of the appropriate Health and Safety Regulations. Use an air-supplied or air-purifying cartridge if the action level is exceeded. Ensure that the respirator has the appropriate protection factor for the exposure level. If cartridge type respirators are used, the cartridge must be appropriate for the chemical exposure. For emergencies or instances with unknown exposure levels, use a self-contained breathing apparatus (SCBA).

Thermal hazard protection: Wear cold insulating gloves when transferring or breaking transfer connections.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

- Physical state: Gas
- Colour: Colourless
- Odour: Repulsive
- Odour threshold: 0.51 ppm (Phosphine)
- pH: Not applicable.
- Relative evaporation rate (butylacetate=1): No data available
- Relative evaporation rate (ether=1): Not applicable.
- Melting point: No data available
PHOSPHINE (5% -<10%) in ARGON, HELIUM or NITROGEN

Safety Data Sheet LIND-M0166

Issue date: 05/05/2015
Revision date: 02/23/2022
Supersedes: 03/30/2021
Version: 1.4

Freezing point: No data available
Boiling point: No data available
Flash point: No data available
Auto-ignition temperature: 38 °C (Phosphine)
Decomposition temperature: No data available
Flammability (solid, gas): 1.8 – 98 vol % (Phosphine)
Vapour pressure: Not applicable.
Relative vapour density at 20 °C: No data available
Relative density: No data available
Solubility: Water: No data available
Partition coefficient n-octanol/water (Log Pow): Not applicable.
Partition coefficient n-octanol/water (Log Kow): Not applicable.
Viscosity, kinematic: Not applicable.
Viscosity, dynamic: Not applicable.
Explosive properties: Not applicable.
Oxidizing properties: None.
Explosive limits: No data available

9.2. Other information
No additional information available

SECTION 10: Stability and reactivity

10.1. Reactivity
No reactivity hazard other than the effects described in sub-sections below.

10.2. Chemical stability
Stable under normal conditions.

10.3. Possibility of hazardous reactions
Catches fire spontaneously if exposed to air. Combines violently with oxygen and halogens. Evolves hydrogen and ignites on contact with many materials.

10.4. Conditions to avoid
Avoid moisture in installation systems. Keep away from heat/sparks/open flames/hot surfaces. – No smoking. Phosphine liberates hydrogen and forms phosphide when passed over heated metal.

10.5. Incompatible materials

10.6. Hazardous decomposition products
Phosphorus and hydrogen at approximately 1100°F (600°C).

SECTION 11: Toxicological information

11.1. Information on toxicological effects
Acute toxicity: Not classified

PHOSPHINE (5% -<10%) in ARGON, HELIUM or NITROGEN
ATE US (gases) 100.1 ppmv/4h
PHOSPHINE (5% -<10%) in ARGON, HELIUM or NITROGEN

**PHOSPHINE (5% -<10%) in ARGON, HELIUM or NITROGEN**

Additional information

Acute over-exposures to this gas mixture can be dangerous due to presence of Phosphine. Non-lethal exposures may result in the following symptoms: lacrimation (watery eyes), substernal chest pain, chest tightness, shortness of breath, a slight cough, and cyanosis. Such exposures can cause gastrointestinal tract irritation and central nervous system effects. Abdominal symptoms include nausea, vomiting, severe epigastric pain, and diarrhea. Neurologic symptoms include vertigo, headache, restlessness, involuntary tremors, lack of muscular coordination, double vision, drowsiness, and a decreased sensation in the extremities. Death can occur in humans after exposure as low as 8 ppm of Phosphine for 1-2 hours. Inhalation may cause severe respiratory irritation and pulmonary edema. Symptoms of overexposure can include headache, coughing, shortness of breath, wheezing, phlegm, abdominal pain, nausea, vomiting, thirst, drowsiness, double vision, dizziness, tremors, and coma. Symptoms may be delayed. Irritating to eyes, respiratory system and skin.

12.5. Other adverse effects

- Other adverse effects: May cause pH changes in aqueous ecological systems.
- Effect on the ozone layer: None.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

- Product/Packaging disposal recommendations: Dispose of contents/container in accordance with local/regional/national/international regulations. Contact supplier for any special requirements.
PHOSPHINE (5% -<10%) in ARGON, HELIUM or NITROGEN

Safety Data Sheet LIND-M0166

Issue date: 05/05/2015  Revision date: 02/23/2022  Supersedes: 03/30/2021

SECTION 14: Transport information

In accordance with DOT

Transport document description (DOT) : UN1953 Compressed gas, toxic, flammable, n.o.s. (Inhalation Hazard Zone B), 2.3
UN-No.(DOT) : UN1953

Proper Shipping Name (DOT) : Compressed gas, toxic, flammable, n.o.s.
Inhalation Hazard Zone B

Hazard labels (DOT) : 2.3 - Poison gas
2.1 - Flammable gas

DOT Symbols

G - Identifies proper shipping name (PSN) requiring the addition of technical name(s) in parentheses following the PSN.

DOT Special Provisions (49 CFR 172.102) : 2 - This material is poisonous by inhalation (see 171.8 of this subchapter) in Hazard Zone B (see 173.116(a) or 173.133(a) of this subchapter), and must be described as an inhalation hazard under the provisions of this subchapter.
B9 - Bottom outlets are not authorized.
B14 - Each bulk packaging, except a tank car or a multi-unit-tank car tank, must be insulated with an insulating material so that the overall thermal conductance at 15.5 C (60 F) is no more than 1.533 kilojoules per hour per square meter per degree Celsius (0.075 Btu per hour per square foot per degree Fahrenheit) temperature differential. Insulating materials must not promote corrosion to steel when wet.

Additional information

Other information : No supplementary information available.

Special transport precautions : Avoid transport on vehicles where the load space is not separated from the driver's compartment. Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency. Before transporting product containers:
- Ensure there is adequate ventilation.
- Ensure that containers are firmly secured.
- Ensure valve is closed and not leaking.
- Ensure valve outlet cap nut or plug (where provided) is correctly fitted.
- Ensure valve protection device (where provided) is correctly fitted.

Transport by sea

UN-No. (IMDG) : 1953
Proper Shipping Name (IMDG) : COMPRESSED GAS, TOXIC, FLAMMABLE, N.O.S.
Class (IMDG) : 2.3 - Toxic gases
EmS-No. (1) : F-D
EmS-No. (2) : S-U

Air transport

UN-No. (IATA) : 1953
Proper Shipping Name (IATA) : COMPRESSED GAS, TOXIC, FLAMMABLE, N.O.S.
Class (IATA) : 2 - Gases

SECTION 15: Regulatory information

15.1. US Federal regulations

All components of this product are listed, or excluded from listing, on the United States Environmental Protection Agency Toxic Substances Control Act (TSCA) inventory.
PHOSPHINE (5% -<10%) in ARGON, HELIUM or NITROGEN

Safety Data Sheet LIND-M0166

Issue date: 05/05/2015

15.2. International regulations

CANADA

Phosphine (7803-51-2)
Listed on the Canadian DSL (Domestic Substances List)

Argon (7440-37-1)
Listed on the Canadian DSL (Domestic Substances List)

Helium (7440-59-7)
Listed on the Canadian DSL (Domestic Substances List)

Nitrogen (7727-37-9)
Listed on the Canadian DSL (Domestic Substances List)

EU-Regulations

Phosphine (7803-51-2)
Listed on the EEC inventory EINECS (European Inventory of Existing Commercial Chemical Substances)

15.2.2. National regulations

Phosphine (7803-51-2)
Listed introduction on Australian Industrial Chemicals Introduction Scheme (AICIS Inventory)
Listed on IECSC (Inventory of Existing Chemical Substances Produced or Imported in China)
Listed on the Japanese ENCS (Existing New Chemical Substances) inventory
Listed on the Japanese ISHL (Industrial Safety and Health Law)
Listed on KECL/KECI (Korean Existing Chemicals Inventory)
Listed on NZIoC (New Zealand Inventory of Chemicals)
Listed on PICCS (Philippines Inventory of Chemicals and Chemical Substances)
Japanese Poisonous and Deleterious Substances Control Law
Listed on the Canadian IDL (Ingredient Disclosure List)
Listed on INSO (Mexican National Inventory of Chemical Substances)
Listed on EPA Hazardous Air Pollutant (HAPS)
Listed on the TCSI (Taiwan Chemical Substance Inventory)

### Phosphine (7803-51-2)

- **U.S. - California - Proposition 65 - Carcinogens List**: No
- **U.S. - California - Proposition 65 - Developmental Toxicity**: No
- **U.S. - California - Proposition 65 - Reproductive Toxicity - Female**: No
- **U.S. - California - Proposition 65 - Reproductive Toxicity - Male**: No
- **No significant risk level (NSRL)**

### Argon (7440-37-1)

- **U.S. - California - Proposition 65 - Carcinogens List**: No
- **U.S. - California - Proposition 65 - Developmental Toxicity**: No
- **U.S. - California - Proposition 65 - Reproductive Toxicity - Female**: No
- **U.S. - California - Proposition 65 - Reproductive Toxicity - Male**: No
- **No significant risk level (NSRL)**

### Helium (7440-59-7)

- **U.S. - California - Proposition 65 - Carcinogens List**: No
- **U.S. - California - Proposition 65 - Developmental Toxicity**: No
- **U.S. - California - Proposition 65 - Reproductive Toxicity - Female**: No
- **U.S. - California - Proposition 65 - Reproductive Toxicity - Male**: No
- **No significant risk level (NSRL)**

### Nitrogen (7727-37-9)

- **U.S. - California - Proposition 65 - Carcinogens List**: No
- **U.S. - California - Proposition 65 - Developmental Toxicity**: No
- **U.S. - California - Proposition 65 - Reproductive Toxicity - Female**: No
- **U.S. - California - Proposition 65 - Reproductive Toxicity - Male**: No
- **No significant risk level (NSRL)**

SECTION 16: Other information

Other information

When you mix two or more chemicals, you can create additional, unexpected hazards. Obtain and evaluate the safety information for each component before you produce the mixture. Consult an industrial hygienist or other trained person when you evaluate the end product. Before using any plastics, confirm their compatibility with this product.

Linde asks users of this product to study this SDS and become aware of the product hazards and safety information. To promote safe use of this product, a user should (1) notify employees, agents, and contractors of the information in this SDS and of any other known product hazards and safety information, (2) furnish this information to each purchaser of the product, and (3) ask each purchaser to notify its employees and customers of the product hazards and safety information.

The opinions expressed herein are those of qualified experts within Linde Inc. We believe that the information contained herein is current as of the date of this Safety Data Sheet. Since the use of this information and the conditions of use are not within the control of Linde Inc, it is the user's obligation to determine the conditions of safe use of the product.

Linde SDSs are furnished on sale or delivery by Linde or the independent distributors and suppliers who package and sell our products. To obtain current SDSs for these products, contact your sales representative, local distributor, or supplier, or download from www.lindeus.com. If you have questions regarding Linde SDSs, would like the document number and date of the latest SDS, or would like the names of the Linde suppliers in your area, phone or write the Linde Call Center (Phone: 1-844-44-Linde (1-844-445-4633); Address: Linde Call Center, Linde Inc, P.O. Box 44, Tonawanda, NY 14151-0044).
