

On-Truck Turkey Stunning *Controlled Atmosphere Stunning*

The drive-through design allows the entire trailer to be processed by section within the tunnel surround.

Eliminate Handling of Active Birds

Linde's on-truck stunning system is the first economical and practical approach to controlled atmosphere stunning of turkeys. This proprietary system utilizes a multi-stage, carbon dioxide atmosphere process to desensitize and immobilize active birds while they are still in the cage. Virtually eliminating the handling of active birds reduces damage to the birds often seen in the shackling process. With the Linde system, the inactive birds are shackled without struggling and results in higher worker satisfaction.

Better Process, Better Product

By eliminating the flapping and agitated state of active birds there is less bruising and wing damage at the beginning of your process. Depending on your operation, the quality of your product has the potential to improve resulting in less trim and product re-work. From the very start of your process, the benefits of the Linde on-truck system are evident when compared to active bird shackling or electric stunning options. With inactive birds, the shackling area can have higher lighting levels. Also, dust, waste and feather debris are greatly reduced.

Features of the Linde® On-Truck System

- Multi-stage, computer controlled process with push button simplicity
- System flexibility depending on product throughput needs
- Low capital investment, quick payback
- Easy installation with minimal disruption to your process
- Approved by the USDA new technology staff
- Linde is a leading authority in CO₂ technology

The single section format allows each trailer section to be emptied and then the trailer advanced to the next section.

Processor Benefits

- Virtually eliminates handling of active birds reducing shackle-line worker fatigue and improving job satisfaction
- Allows for improved shackling area lighting and housekeeping
- Birds remain unconscious until further processing steps greatly reducing bruising and wing damage
- Created to utilize existing cages and transportation equipment
- Significantly improves product quality for your operation

A Wealth of Experience and Support

When you choose Linde, you're selecting more than the largest supplier of industrial gases in North and South America. You're also selecting a support team that includes:

- Experienced food scientists and engineers
- A complete array of services, including on-site evaluation of your unit's operation
- Installation, lay-out and start-up support through Linde's Total System Approach

Linde provides everything you need to improve the quality and consistency of your product as well as your process.
