

Medipure™ Oxygen-LC

Advanced Technology for the Delivery of Oxygen

Streamlines setups, saves time and helps you focus on patient care

When small capacity cylinders are not enough, the award-winning *Grab n Go*® technology is now available in large K/H and T size cylinders.

The new *Medipure*™ *Oxygen-LC* System from Praxair eliminates the need for maintaining inventory of oxygen regulators and the associated cost of ownership including purchase, replacement, repairs,

and tools needed to connect to the cylinder. We've also virtually eliminated the delays associated with having to swap regulators from one tank to another.

Whether for therapy or emergency preparedness, *Medipure*™ *Oxygen-LC* from Praxair has you covered, saving critical time at the point of care.

Fast set up

Regulator is permanently attached
Fewer components
to track down

Reduced Equipment Costs

No capital outlay for
regulators or flowmeters

Versatile

DISS Connect 50 psig port
Auxiliary pressure 100LPM
Gas specific safety connection
Quick changes between cylinders

Therapy Ready

Integrated flowmeter* with
hosebarb connection
Adjustable flow facilitates therapy
by mask or nasal cannula

Easy to Use

Contents gauge for easy monitoring
and flow meter for quick flow
adjustment

Simplified Emergency Oxygen Supply

No need to maintain stock of
regulators or wrenches

* 0.5, 1, 1.5, 2, 3, 4, 6, 8, 10, 15, 25 lpm
