

Ignite Your Productivity Introducing the Linde OPTIVIEW™ Image Analysis System

Imagine all that – while realizing smoother, more consistent operation.

Introducing Linde OPTIVIEW, the system that uses flame image analysis technology to enhance combustion control and reduce emissions.

This innovation enables real-time, automatic control of the energy introduced into the melting process. That means your operation is always being controlled to drive the kind of fuel savings, reduced emissions and increased productivity that can make a positive, material impact on your operation.

Here are some of the major features and benefits of the Linde OPTIVIEW Image Analysis System:

- **Flexible set-up** can be installed with different burner configuration
- **Industrial hardened camera** withstands harsh operating conditions while requiring minimal maintenance
- **Real-time flame monitoring** activates immediate response to process deviations
- **Dynamic combustion control** ensures consistent operation while reducing demand on operators

If you're looking to improve the energy efficiency and cost savings of your operation, the Linde OPTIVIEW system is the solution for you. To learn more, contact your Linde representative or call **1.844.44LINDE**.
