Praxair’s Onsite Nitrogen plants are the preferred solution for customers who demand high reliability and low total cost of supply.

If you are focused on efficiency, Praxair Onsite Nitrogen plants are designed with you in mind. You care about the cost of nitrogen, but you also know how important it is to your operation. Praxair plants are designed and constructed to meet stringent reliability requirements. Praxair plants are also designed to be efficient.

Praxair’s modular plant design means we will install your plant in a matter of days with a minimum of disruption to your facility and operation. The combination of effective installation, high efficiency and reliability makes Praxair’s Onsite Nitrogen system the cost effective choice.

**Praxair’s Onsite Nitrogen Plants:**
- Leading safety performance
- High reliability
- Remote monitoring and operation
- Liquid backup supply
- Robust design
- Low cost mode of supply
- Power efficient
- Superior turnaround
- World-class project execution
- Modular plant design
- Compact plot size
- Minimal customer site prep
- Less installation time
- Reduced noise
For customers needing up to 56,100 cfh-ntp of nitrogen, the ideal supply is Praxair's N40 XL. The N40 XL is a cryogenic nitrogen plant that consists of a Warm End which includes the air compressor package and prepurifier equipment, and a Cold End which includes the distillation column, primary heat exchanger, and main condenser. The N40 XL uses liquid assist for the refrigeration requirement of the plant. The system also comes with a liquid nitrogen Backup System for ultimate reliability.

The N40 XL includes a nitrogen compressor.

Praxair’s Onsite Nitrogen Plant Line

For customers needing up to 56,100 cfh-ntp of nitrogen, the ideal supply is Praxair's N40 XL. The N40 XL is a cryogenic nitrogen plant that consists of a Warm End which includes the air compressor package and prepurifier equipment, and a Cold End which includes the distillation column, primary heat exchanger, and main condenser.
